

**Waste Operations Task Force Meeting
Jan. 8, 2002, CAB office**

Members present: Merryman Kemp, chair
John Tillson

Support staff present: Bruce Gardner, DiG

Kemp called the meeting to order at 5:35 p.m.

Kemp said she had attended the DOE meeting on the depleted uranium hexafluoride conversion and passed out some materials she had collected.

Tillson asked if anyone had said what DOE planned to do with the fluorine. He said he thought it would be reused, if it can be cleaned first.

Kemp said WPSD-TV had announced tonight's meeting on their morning news program, but had said it was a full board meeting, not a task force meeting. She said she called the station about that, but did not know if the information was corrected in later newscasts.

Tillson asked about the status of the seismic study at Barnes Creek and the white paper on the North-South Diversion Ditch wastes.

The meeting was adjourned at 6 p.m.
