

**Surface Water Task Force
February 5, 2002, CAB Office**

Members present: Linda Long
Bill Tanner
Mark Donham, ex-officio

Support Staff present: Stacey Young
Chris Marshall

The meeting was called to order at 12:10 p.m.

The group briefly discussed current schedules for the site wide sediment controls project, North South diversion ditch and scrap metal removal project.

The remainder of the meeting focused on the development of a recommendation concerning the rehabilitation of sewer pipes at the PGDP. The task force believes leaking sewer pipes are adding contaminants to the soils and groundwater and charging the plume as it migrates off site.

The task force supports the attached recommendation and will bring it to the full board requesting consensus at the February 21 meeting.

The meeting adjourned at 1:05 p.m.
